ReStore®

HABITAT RESTORE TRUCK WRAP PROGRAM

We are both honored and excited to be partnered with ReStore, and we look forward to working with every facility nationwide. Capital Wraps will provide a single point of contact for your vehicle graphic needs, as well as consistently meet all branding compliance standards for your business. We look forward to working with you!

PROCESS

We want to make the process of ordering your vehicle wrap as smooth as possible. To begin the stages of wrapping your vehicle all forms can be found on the website in the Document Library. Please submit the graphic order form online, then refer to the measuring video and vehicle picture guidelines. Your vehicle images, measurements, affiliate logo, and payment authorization form must all be submitted by fax or email.

DESIGN

Our designers have created seven custom made designs for Habitat ReStore. Each final design will include your specific business address and phone number for your vehicle and location. The photos you send to us are helpful in accurately depicting where door handles, hinges, and particular items are located; these details may be unique to your truck or van.

DESIGN OPTIONS

PRINTING

Your printed vinyl wrap is created by professional designers and printers in our shop to fit your specific vehicle. We have the newest technology in printers and production techniques. Our printers produce photographic quality images with amazing results and clarity.

INSTALLATION

We only use other USAGG master certified installation teams to insure quality and a professional finish to the wrap process. Our Project Managers search diligently for installers near your location. Prior to installation, all vehicles must be thoroughly washed. If there is oxidation on the vehicle, the vehicle will need to be acid washed (this can be done at most truck stops across the country).
